FUEL CONTROL

VIDEO MONITORING

Video monitoring

Wialon brings together satellite monitoring and video surveillance in one platform for you to reduce accident rates, increase fuel economy, and improve safety on the road.

• Use **video playback and livestream** to capture, observe and analyze any road events you might need to make decisions for your business.

• **View accident videos right from the reports:** accurate unbiased video records enable precise incident analysis.

• **CMSv6 integration:** connect devices that support CMSv6 in a snap.

• **Easy setup and configuration** both for the service provider and the end-user offer a faster start to using video monitoring.

GURTAM

Fleet management

• **Real-time monitoring and analytics.**
Enhance your fleet performance, keep the cargo safe at all times, make employees drive responsibly, and save money on maintenance.

• **Fuel consumption control.** Monitor fuel consumption in all types of vehicles, diesel generators, and filling stations.

• **Driving safety.** Employ Wialon to create a comprehensive driving quality assessment model specific to your enterprise. The analysis is based on preset and custom violation criteria and allows to identify reckless drivers.

Fuel control

Detect any type of fuel misuse and control the whole cycle of fuel distribution from filling stations to vehicles and machinery.

• **FLS data.** Analyze fuel consumption depending on a fuel level in the tank at different time points.

• **Fuel consumption by math.** Use engine operation and efficiency sensors as coefficients for fuel consumption rates.

• **CAN bus data readings.** Tap into fuel parameters received via CAN bus of your vehicles.

• **The proprietary fuel management system.** Detect fuel thefts in the most complicated cases, including underfillings, card frauds, insufficient driving, siphoning, and much more.

HOS/ELD compliance

Hours-of-Service app module available in Wialon allows for effective HOS/ELD compliance control. Start using it and enjoy the extended functionality.

• **Use Dashboard** to view driver compliance within the whole fleet

• **Keep separate electronic logs** for each driver

• **Stay instantly compliant** with HOS final regulations and the latest ELD mandate

• **Avoid fines** due to failing DOT inspections

• **Keep CSA basic scores low**
