

WiaTag: delivery monitoring in Kuwait

Challenge

Zitaat, the company from Kuwait, provides McDonald's, Dip'n'Dip, Arby's and other restaurants and fast food chains with an online food ordering platform together with vehicles that take the food from the restaurant and deliver it to the clients. The company needed the [GPS monitoring system](#) to track 500+ vehicles and access to the order history.

Solution

Specialists of Space link decided to use Wialon API and WiaTag. They installed WiaTag on the couriers' smartphones and connected them to Wialon platform. Now Zitaat gets the drivers' location and speed data as well as info on the battery level of 500 phones.

Each restaurant has a Wialon account where the dispatcher can monitor vehicles online, build reports, and get notifications. Geofences help to control the presence of drivers in loading and delivery zones.

Results

 **24/7**

Dispatchers monitor GPS tracking unit locations and routes 24/7 in Wialon Hosting

 **500**

vehicles were connected to Wialon within a week with the help of the drivers' phones and WiaTag

 **Access**

to the yearly order history and the opportunity to build reports based on the data for this period

Company profile

Country: Kuwait

Industry: Local deliveries
