

WIALON VIDEO MODULE

Gain full visibility into your fleet with the Wialon video module. Learn what happened during an accident, provide insurance companies and customers with proof in case of disputes, control your drivers and cargos, and more.

The module is part of Wialon, the GPS tracking platform, works with 90+ MDVR models (the list keeps expanding) and is now available for the Wialon mobile app users.

KEY FEATURES

WATCH VIDEOS FROM SEVERAL CAMERAS

Watch live streams or recordings from several vehicle cameras simultaneously to gain a complete view of what's going on with your vehicle. You can also save these videos in a single file.

A MAP NEXT TO THE VIDEO PLAYER

Be sure you won't miss any events happening on the road. Watch videos from any number of cameras and monitor a vehicle on the map in the same tab.

AUTOMATED AND MANUAL VIDEO SAVING

Save video files manually or set up the automated saving for any events using notifications.

CONVENIENT WORK WITH VIDEO FILES

Find videos using filters (by date, name, and notification type) and tag files as important to save them for a longer time.

VIDEO MARKERS ON THE MAP

Saved video files are displayed on the map as markers. It allows you to immediately learn where the recording was made. It also saves time when looking for the right file.

REPORTS WITH VIDEOS

Take advantage of reports that include video proof of accidents, violations, and other events.

WHY USE THE WIALON VIDEO MODULE?

- ▶ The next level in fleet tracking and management
- ▶ Available in the mobile app
- ▶ Intuitive interface
- ▶ Compatible with multiple MDVR models
- ▶ A convenient billing system with 24/7 access to traffic and storage data
- ▶ Based on practical experience of fleet owners
