

# TRACKING FIELD WORKERS WITH WIALON

As a business owner, track your employees' location and performance, assign tasks, and oversee their execution. Workers install a mobile client on their smartphones and send data to Wialon that further processes it and generates comprehensive reports.

Relying on these reports, businesses can have a single view of employee progress and develop data-driven strategies to improve results.

## KEY FEATURES

### LOCATION TRACKER

Easily determine and monitor employee location on an interactive map.

### ALERTS

Receive timely alarm messages in case of an emergency to act early.

### REPORTING

Consolidate and interpret data (location, images, messages, etc.) collected from field workers.

### SENDING IMAGES

Get images and photos from the job site to know the situation firsthand.

### EMPLOYEE STATUSES

Check each worker's status (Away, Busy, and Available) to be informed about their activity during a day

### ONLINE CHATS

Communicate with employees and send tasks, as well as receive location or photos on demand.

### FLEXIBLE OPERATION MODES

Choose the suitable battery consumption mode or create a custom one

# WHY TRACKING FIELD WORKERS WITH WIALON

## Applicable in any business

The solution is suitable for employee progress tracking across any industry: transportation, tourism, retail, healthcare, construction, etc.

## Highly customizable

Configure the solution based on your business-specific needs: tasks, the number of workers, etc.

## Modern interface

An easy-to-navigate and intuitive interface contributes to reducing the learning curve for workers using the mobile app daily.

## Supported remotely 24/7

Troubleshoot issues, deliver updates, or change mobile app settings in no time without the need to physically access an employee's smartphone.

## Configured in bulk

The settings are sent to multiple devices simultaneously, which saves time on manual app configuration for each worker.
