User Guide 

TIA

TIA is the lightweight version of our Installer App, built for speed and simplicity without sacrificing accuracy. It's designed to streamline the telematics device installation process—perfect for operations that demand agility and precision.

Essential Features Only

Capture all the key data—IMEI, ICCID, MSISDN, VIN, installation photos, and configurations—in one place.

Fast & Efficient

No clutter, no confusion. Just the tools you need to get the job done right, every time.

Centralized Database

All your installation details are securely stored and easily accessible from a single source. Whether you're handling high-volume installations or working in the field, TIA ensures a seamless and reliable workflow.
